# Introduction

In 2016, Stanford Prevention Research Center and ChangeLab Solutions conducted a legal epidemiological study that linked policy and demographic data for California's jurisdictions with data for county-level smoking prevalence.\*

The team identified 539 jurisdictions<sup>†</sup> in the state of California and systematically coded all city and county laws to quantify the degree of closure of loopholes in California's 1994 Smokefree Workplace Act.

Researchers hypothesized that jurisdictions that closed more loopholes in the Smokefree Workplace Act would tend to have the following characteristics:

- larger, nonrural populations
- higher median household income
- higher percentage of non-Hispanic white residents

The team also hypothesized that loophole closure at the county level would be associated with a lower prevalence of smoking.

---

\* Prochaska JJ, Hazarika Watts M, Zellers L, et al. Inequity in California's smokefree workplace laws: a legal epidemiological analysis of loophole closures. *American Journal of Preventive Medicine*. In press.

† 539 jurisdictions (482 cities and 58 counties, including the City & County of San Francisco, which share a municipal code) were identified. County ordinances apply to unincorporated areas only, except in the City & County of San Francisco. Three cities (Loyalton, Needles, and Westmorland) were excluded from the sample because their municipal code or relevant ordinances could not be obtained.

# Findings

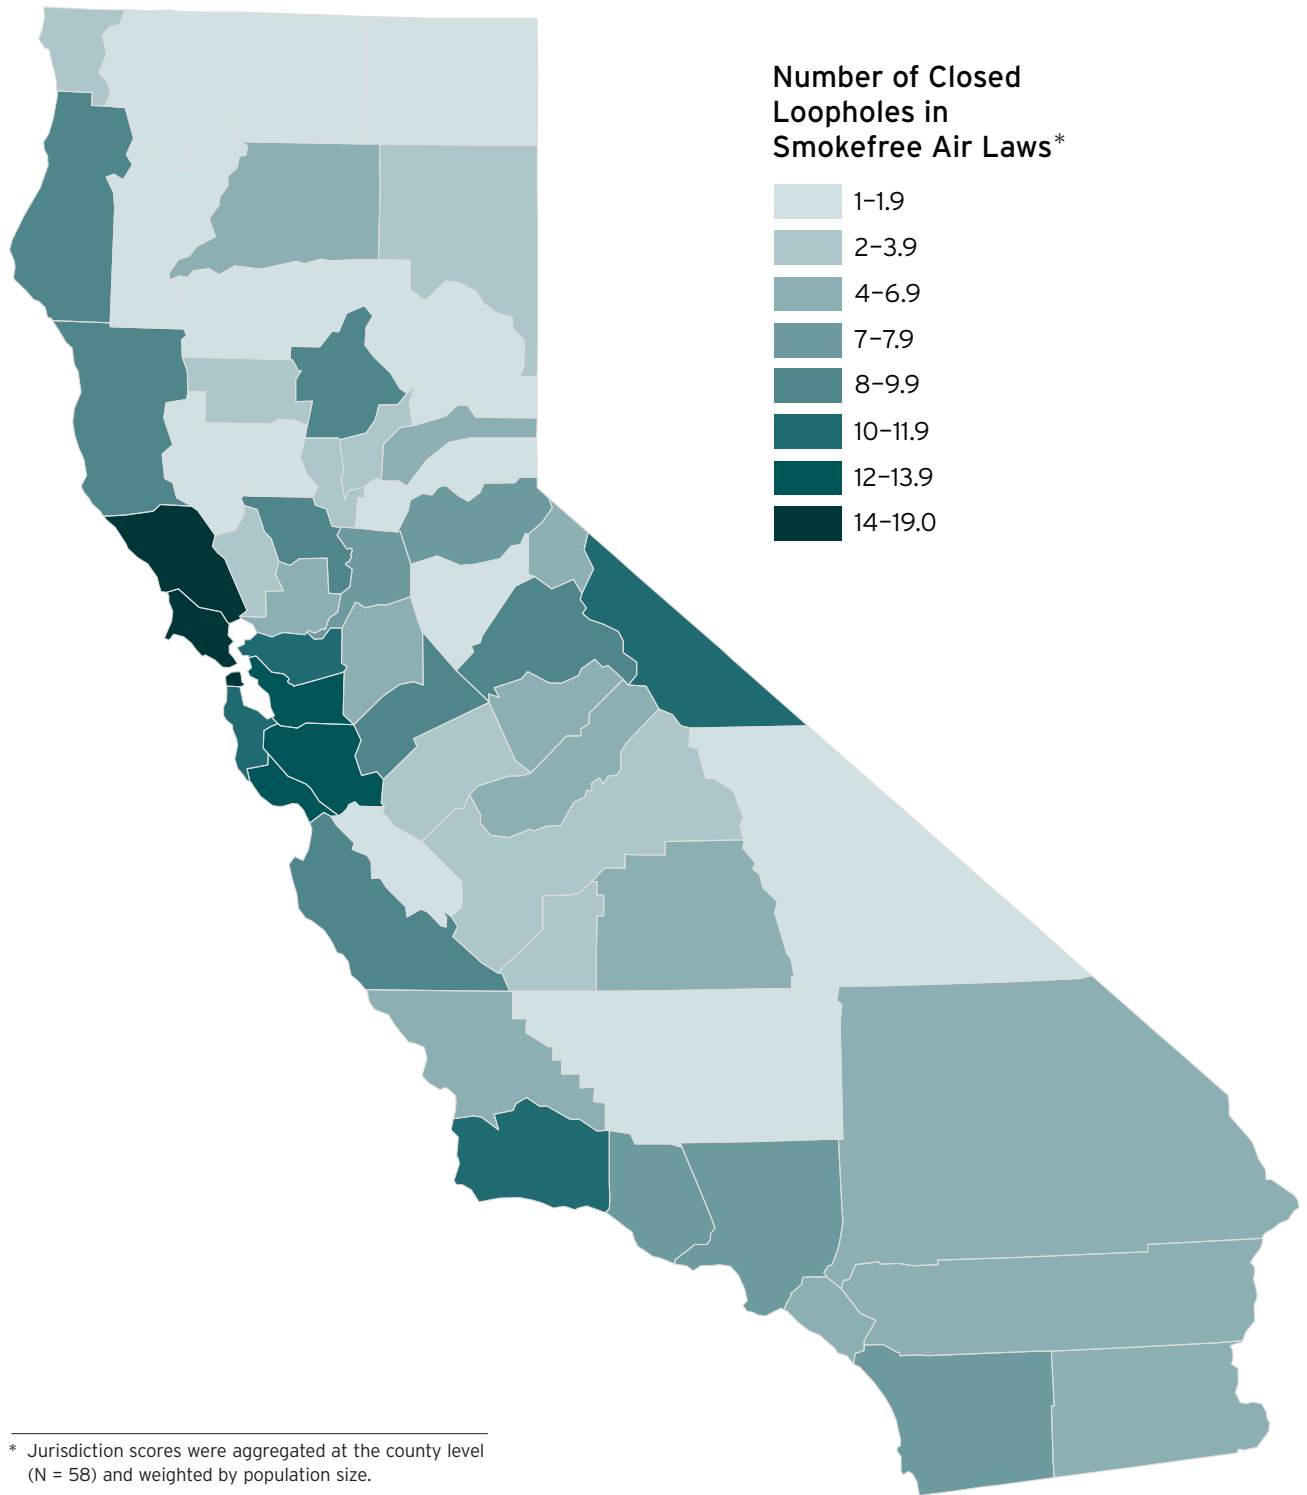

Initial hypotheses were confirmed. Cities and counties that closed more loopholes in California's Smokefree Workplace Act tended to have larger, nonrural populations, higher median household income, and a higher percentage of non-Hispanic white residents. Jurisdictions with higher loophole closure scores (ie, a larger number of loopholes closed in the jurisdiction) had lower smoking prevalence.

From 2015 to 2016, the state of California closed 6 loopholes, helping to reduce inequities and narrow the gaps between local jurisdictions. With the changes to state law, loophole closure scores improved more in jurisdictions that were less populated, with less affluent residents and fewer non-Hispanic white residents.

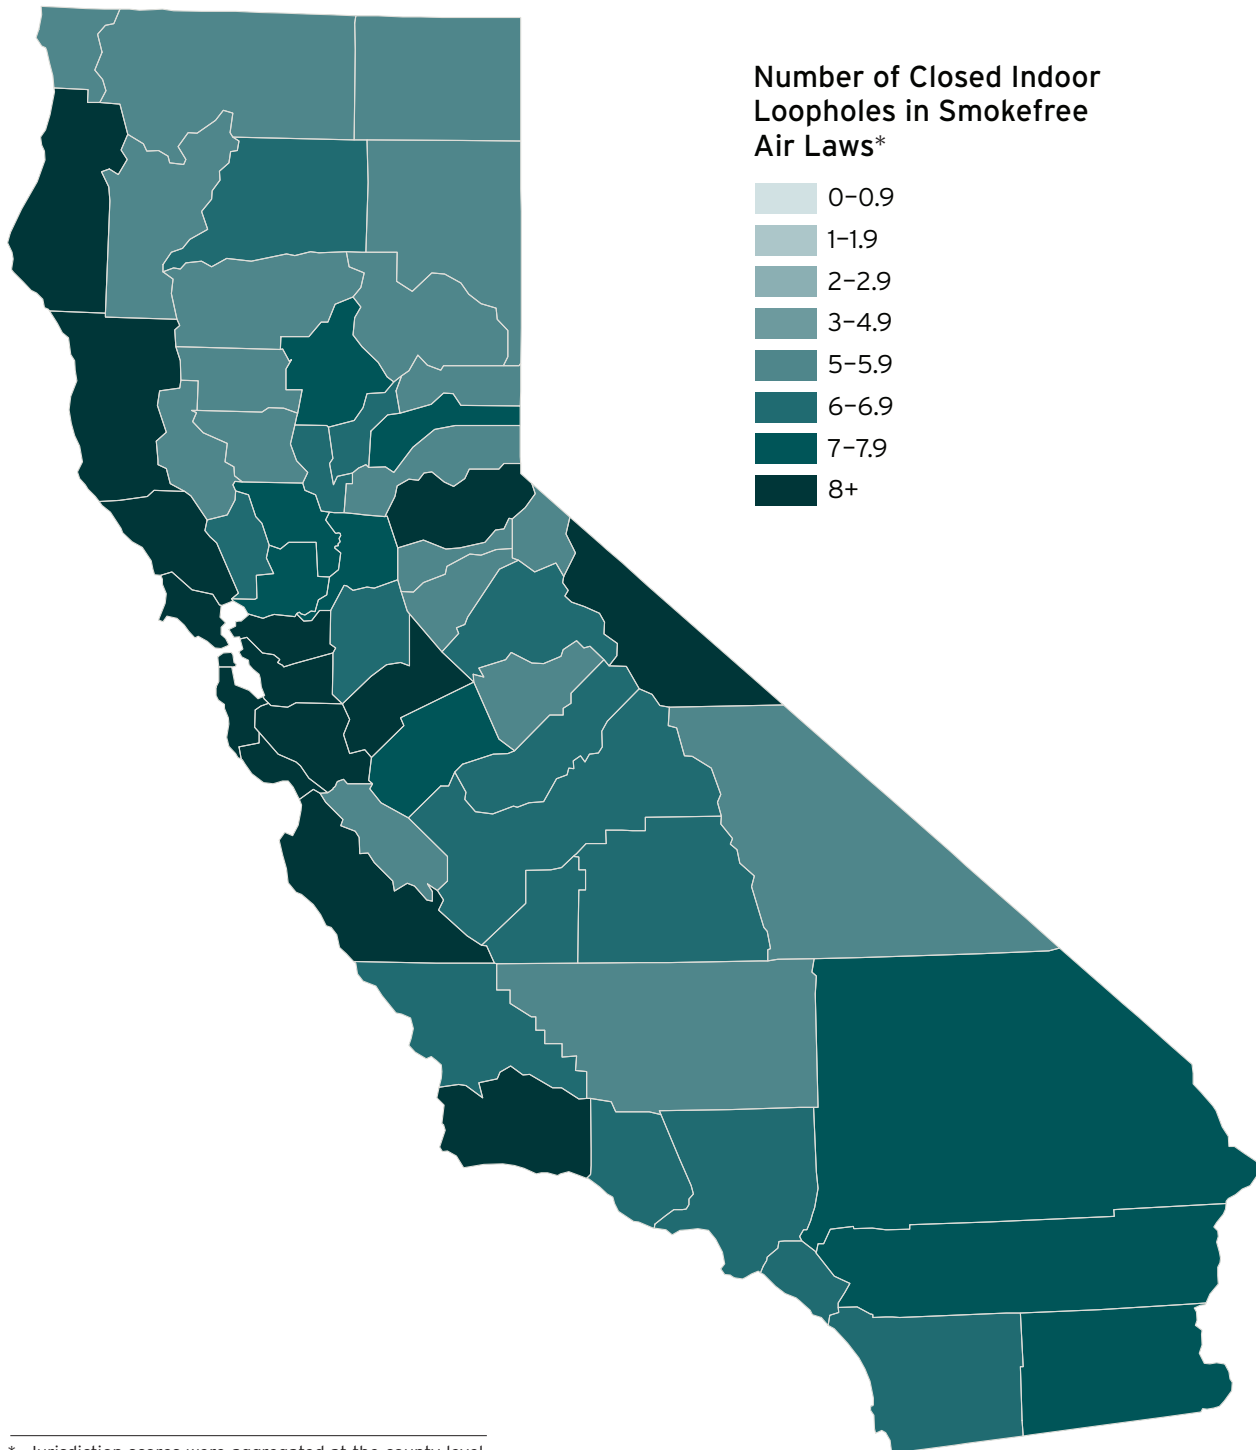

Closing loopholes in local and state laws directly affects residents of the jurisdiction where the loophole is closed. Moving forward, researchers and lawmakers should consider which populations and what percentage of the population are protected by strong smokefree workplace laws.

Researchers identified 11 loopholes that apply to indoor spaces and 8 loopholes that apply to outdoor spaces, for a total of 19 loopholes. Maps 1, 2, and 3 represent the total, indoor, and outdoor loophole closure scores by county throughout the state of California. Tables 1, 2, and 3 list total, indoor, and outdoor loophole closure scores for each city in California (grouped by county), as well as unincorporated areas of each county. Tables 2 and 3 list individual indoor and outdoor loophole closure scores for each city and for unincorporated areas of each county.

**MAP 1.**  
**Total Indoor & Outdoor Loopholes Closed, by County, 2018**

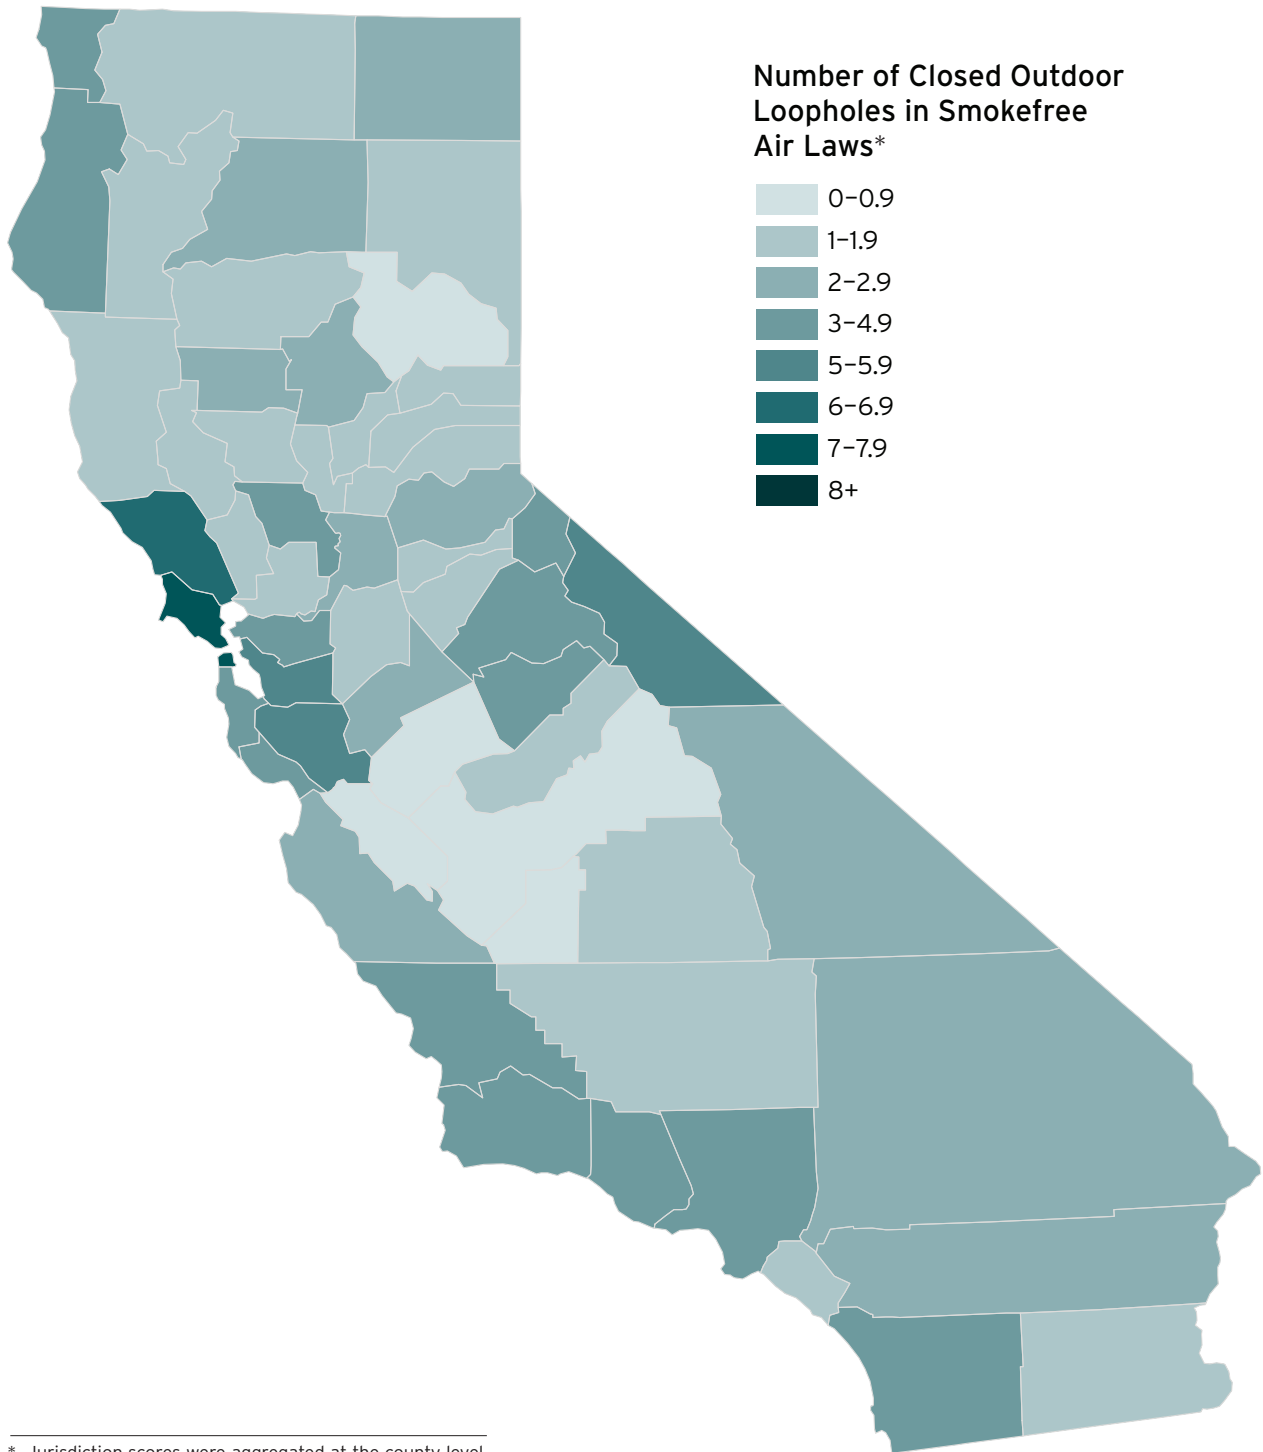

**MAP 2.**  
**Indoor Loopholes Closed, by County, 2018**

\* Jurisdiction scores were aggregated at the county level (N = 58) and weighted by population size.

**MAP 3.**  
**Outdoor Loopholes Closed, by County, 2018**

**TABLE 1.**  
**Total Loopholes Closed in California Cities and Unincorporated Areas of California Counties**
