Collaborative HEALTH
How do you build a healthy community?
Environment is everything
Food
Air & Water
Recreation
Toxin & Tobacco free
Housing
Community
Jobs & Opportunities
Our health is affected by the places we live, work, & play.
How can we create HEALTHY ENVIRONMENTS?
Experts like the CDC agree that the best way to achieve health is to change environmental factors.
To create change, there must be policy.
Policies provide the framework.
Healthy Eating
Parks & Recreation
Tobacco Free Environments
Economic Opportunity

NOW HIRING

GRAND OPENING
Schools
100+ years of policy has accomplished a lot.
1.6 million lives saved, for instance
Sometimes policy doesn’t take health into account
PREVENTING US FROM SOLVING our biggest challenges
Violence
Poverty
Chronic disease
Climate change
Consider one beautiful park
What happens when park policy is disconnected from housing policy?
Consider a new roadway
What happens when transportation agencies are disconnected from air quality agencies & the local health department?
WHAT IF WE COULD change it?
Working together to tackle our biggest problems
What would it look like?
A new approach
Health in all policies
Sustainability in all policies
Equity in all policies
It all means one thing:

BRINGING PUBLIC AGENCIES TOGETHER
A policy sets the framework for the new approach.
5 Key Strategies for Collaborative Health

1. Convene & collaborate
2. Engage & envision
3. Make a plan
4. Invest in change
5. Track progress
