# Building Healthy, Equitable Communities Through Equitable Laws & Policies

[changelabsolutions.org/the-series](http://changelabsolutions.org/the-series)

April 24, 2018

# Welcome to the Building Healthy, Equitable Communities Series

## Episode 1: Health Equity (April)

Building healthy, equitable communities through equitable laws and policies

## Episode 2: Healthy Children & Families (May)

Building healthy, equitable communities through supports for working families

## Episode 3: Food Systems (June)

Building healthy, equitable communities through a just food system

## Episode 4: Built Environment (August)

Building healthy, equitable communities through comprehensive city planning

## Episode 5: Schools (September)

Building healthy, equitable communities through transforming the school climate

## Bonus Training: Preemption (October)

Preemption, public health, and equity - the search for local solutions

## Episode 6: Community Power (October)

Building healthy, equitable communities through community-driven solutions

What you  
can expect  
from our  
episodes:

## Blog Post

10 Local Laws That  
May Be Doing More  
Harm Than Good

## Webinar

Building Healthy, Equitable  
Communities Through  
Equitable Laws & Policies

## Expert Panel

Continued Conversation  
About Health Equity  
(April 26)

**Welcome!**

Marin City Health &  
Wellness Center

# RACISM & GENTRIFICATION

A PUBLIC HEALTH CRISIS

*JayVon Muhammad*

# Social determinants of health for the **healthy** community

**Connection, Community & Culture:** Elders & rules

**Access to Education:** High performing schools

**Quality Housing:** Options to own or rent

**Access to Good Health Parks / Outdoor Space:** Accessible recreation & exercise

**Marriage:** Functional relationships

**Economics:** Small business opportunities

**Access to Good Health Care:** Longer lives & less disease

**Environment:** An environment free of environmental toxins

# Social determinants of health for the **poor black** communities

## **Gentrification:**

Families are forced to move out of their community

## **Underperforming Schools:**

Teachers afraid of students, medicated children, Special Ed, school-to-prison pipeline

## **Public Housing / Little-to-no Opportunities to Own Homes:**

Unsafe housing, Red-Lining, discrimination

## **Lack of Clean, Safe Places to Play:**

Fewer tax dollars mean less resources/amenities

## **Lack of Healthy Marriages / Single Mom-led Households:**

Healthy relationships not being modeled and/or revered

## **No Black-Owned Business Community:**

Cannot qualify for loans, young people don't learn entrepreneurship

## **Few Doctors Take Medi-Cal:**

Lack of Black practitioners, distrust, family-only health coverage

## **Environment:**

Environmental Justice issues, toxic waste zones, limited access to clean land/water

# THE HISTORY

*Since being brought  
to the United States  
through Slavery,*

*“Black people have  
always had to play*

*DEFENSE...*

*But, OFFENSE wins  
games.”*

*– Sis Ava*

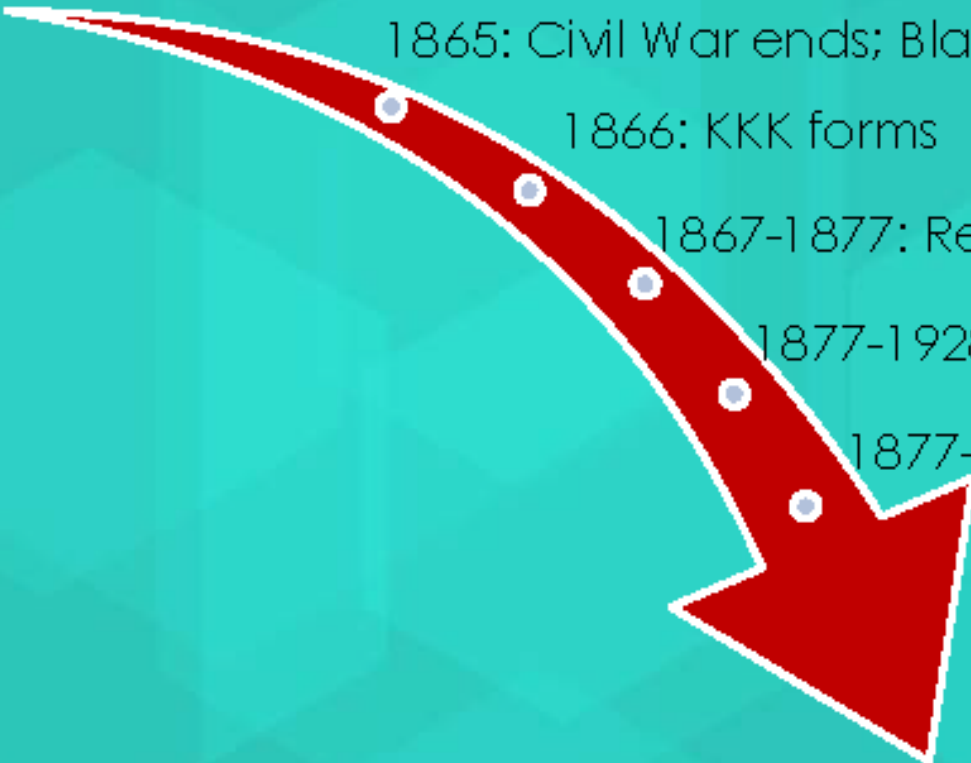

The Result of Slavery was a “made” people who had their memories erased, were trained to distrust and hate one another and taught that everything white is right...white people were superior, smarter, prettier, more powerful... even Jesus is White, right?

The most important thing that could be taken from a person was taken in Slavery – **IDENTITY**, the connection to Language, Culture, Ancestors and Religion.

**ALWAYS ON THE DEFENSE**

1865: Civil War ends; Black Codes begin

1866: KKK forms

1867-1877: Reconstruction

1877-1928: Convict leasing

1877-1950s: Jim Crow

1921: Black Wall Street

1923: Rosewood

1954-1968: Civil Rights  
Movement

1954-1968:  
Civil Rights  
Movement

1971:  
Co-intel-Pro  
FBI program

1980s-90s:  
Crack  
introduced  
to Black  
communities  
(cocaine  
elsewhere)

Prison-  
Industrial  
Complex

Gentrification

1960's & 1970s Fillmore,  
Marin City, etc...

What kept  
us sane,  
connected  
and alive?

## COMMUNITY

- The building of a culture from nothing
- Survival skills
- Cooperative Economics
- Support
- The importance of education, good manners, marriage and family, and work

**AND  
THEN  
CAME...**

# CRACK COCAINE

## Pre-crack:

- Rosewood, Black Wall St., Fillmore District
- Working families in Marin City / Bayview Hunters Point shipyard jobs
- Intact families stay together & sacrifice for the community
- Black excellence, home-based businesses

## Post crack:

- Families broken
- Death
- Child “Protective” Services
- Community breakdown
- Gangs
- Fatherless homes
- Prison

No recovery since crack

Loss of Community  
& Family Structure

+

Loss of Black  
Business Districts

**= Prime environment for  
Gentrification**

# How **white “norms”** affect SDOH in **poor black** communities

## **Culture:**

White “gentrification” trumps Black culture: displaces Black families for the sake of diversity (weaponized), changes the fabric of the community & creates the Willie Lynch syndrome

## **Schools:**

Lack of culturally appropriate curriculum that models Black leaders, education fails to make leaders

## **Housing:**

Laws that prohibit Blacks from owning property

## **Language:**

Inferiority complex, liberal microaggressions

## **Lack of Marriage:**

No longer considered important

## **Work for Others:**

Blacks taught to get a job vs. starting businesses/building local Black economies and Blacks lack access to resources

## **Healthcare:**

Continued medical experimentation, lack of cultural competence

# To survive, Blacks have become “functioning white people”

## MENTAL HEALTH

Depression

Anxiety

Disassociation & Self Hatred

## PHYSICAL HEALTH

Hypertension & Cardiac Diseases

Diabetes

Obesity

*Young Black people are showing up different. But to prove that nothing has “really” changed; That White people still have to have the controlling voice and set the expectation...that Black people have still not been freed up to heal and repair their broken experience*

*– Colin Kaepernick*

This is why the MCHWC mission of **African American health equity** is so important *and* so difficult.

African immigrant women have the same reproductive health outcomes as White women

So **WHY** is an African American woman **born and raised in the U.S.** nearly **3** times as likely to die in the year surrounding childbirth than a White woman?

A true revolution of values will soon cause us to question the fairness and justice of many of our past and present policies. On the one hand we are called to play the good Samaritan on life's roadside; but that will be only an initial act. *One day we must come to see that the whole Jericho road must be transformed so that men and women will not be constantly beaten and robbed as they make their journey on life's highway.*

*True compassion is more than flinging a coin to a beggar; it is not haphazard and superficial. It comes to see that an edifice which produces beggars needs restructuring.* A true revolution of values will soon look uneasily on the glaring contrast of poverty and wealth...and say "This is not just."

– Martin Luther King, Jr.

*"A Time to Break the Silence," Riverside Church, New York City, April 4, 1967*

# Our Ask

What happens when we value a community?

Gay Marriage\*

Sanctuary Cities\*

Recreational Marijuana\*

**\*All were against the Federal Law**

# AGENDA

- What do we mean by health equity?
- How can policy promote health equity?
- How can we shift the narrative?
- What's the role of local government?
- How do we sustain equitable change?

What do we mean by  
**health equity?**

## What is equity?

Health equity = "the state in which everyone has the opportunity to attain full health potential and no one is disadvantaged from achieving this potential because of social position or any other socially defined circumstance."

(source NAS)

EQUALITY

EQUITY

**You say health equity, I say...**

**Fairness / Justice / Opportunity**

The goal is for health equity efforts to be effective.

**Racism must be addressed  
to achieve health equity**

Addressing the root  
causes of poor health

How can law & policy  
promote health equity?

Efforts to **remove resources**—even unhealthy ones—from already under-resourced communities may not be received well

Focus on  
**health-promoting**  
community  
resources

# Supporting community resilience

Understand the effects of  
trauma on a community  
Work to build resilience

# Community- directed policy

Community Power +  
Policymaking Process =  
**Improved Health Outcomes**

How can we shift the  
narrative for **health equity**?

Setting the **historical context**  
of health equity

# Acknowledging **past harms** to create a more **just future**

Shift the frame to systems thinking and away from the idea that individuals bear the responsibility for poor health caused by decades—or centuries—of systematic harm

**Systems thinking**  
is important for health equity

# Changing the frame

Using traditional  
data &  
community  
experience

Consider the  
trade-offs in  
how you use  
**data**

What's the role of **local government** in promoting **health equity**?

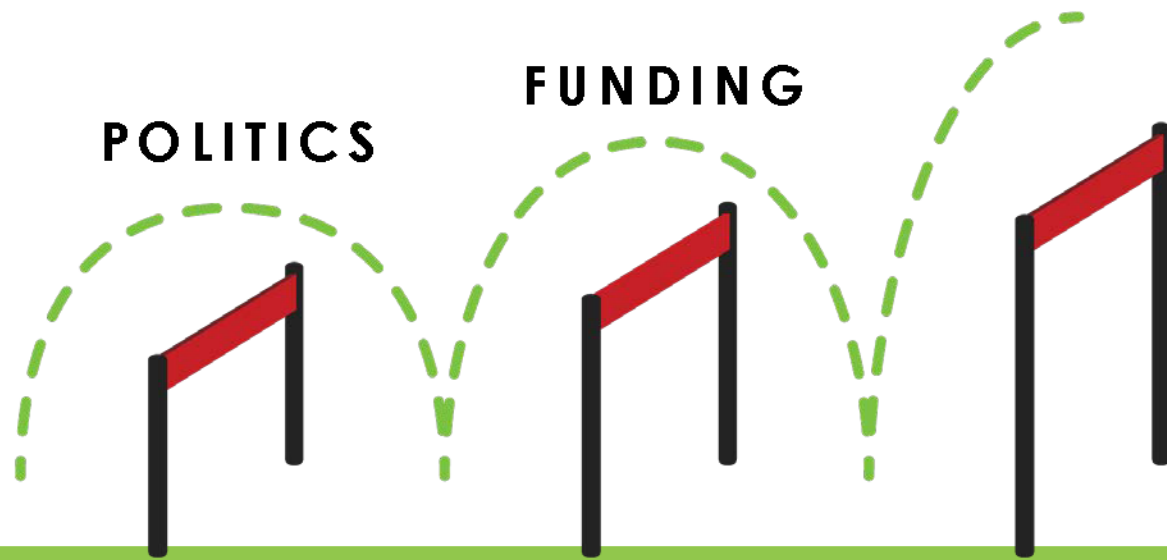

There is an opportunity for different fields to come together to produce & protect **equitable local innovation** in policy

**Local governments** can  
& should be effective  
partners in addressing  
community priorities

# PREEMPTION

Preemption often appears  
as a hurdle to **equitable  
changemaking**

**Preemption** is a legal tool that can be used to stifle equitable policy or to protect it

How do we **sustain**  
**policy** that promotes  
**health equity**?

# Change takes...

Time

Commitment

Effort

Relationship building

Financing

Stability

Policy can be  
**messy**

Equitable policy change requires  
shifting the power base **without**  
**leaving people behind**

# Issues in equitable funding & financing

Lack of infrastructure and services

Lack of funding & resources to make changes

Siloed funding streams

## Strategies to equitably direct resources

Direct resources to undeserved communities & policies that address their needs

Invest & divest

Use existing funding streams more flexibly

# Effective implementation & accountability

Ensure **equitable enforcement** to  
improve policy impact

**Evaluation** is essential to ensure that policy is working

# Troubleshooting for **unintended consequences**

School discipline policies

Tobacco "PUP" laws

Occupancy standards for  
rental housing

Criminalizing food sharing

**Whose perspective** do you still need?
